Dear visitors and friends of Chalki, you make a difference !

 You are spending your holidays on the Island of Chalki because – among other reasons – it has kept its natural beauty, the charm of its old houses and the crystal clear water. Goats, sheep, chicken, pigeons, dogs and cats are part of the ecological balance of the island. But where have the cats gone ? Only some years ago they assembled on the harbourfront in wait of incoming fisher boats and of their share of the fish. This does not exist anymore. Those cats which survive illnesses and poisoning – even the neutered ones – need your help.

What can you do ?

-  • You can help by convincing your Greek friends and acquaintances of how important the protection of animals is for you and your well-being on the Island.
- You can help by offering your yard or garden to the Animal Help Societies, to ensure the safe feeding of cats in winter.
- You can help by sponsoring our work by transferring money to our Bank Account and by putting money into the piggy bank at Zifos` Travel Agency or at the Hotel.

What we do?

Our aims and options

 **Protection and ethical treatment of the animals and education of the people** Every year, many animals on the island must die because of illness, malnutrition, injuries or killing actions in winter. Via a yearly letter to every inhabitant of Chalki we inform about the fact that all animals contribute to the ecological balance and perform an important function, which has great importance for the tourism. With English books about animals we support English lessons for the school children, we provide learning material about cats and dogs for school lessons.

 **Feeding:** Securing sufficient food for free living cats in winter and in times of low tourism at protected feeding spots. Donations for the buying of food are urgently asked for.

 **Neutering program and medical aid** has started in February 2010 and will be continued in October. By such we try to prevent uncontrolled procreation and killing actions resulting thereof. The veterinarians will also take care of injured animals and of farm animals in poor or critical conditions.

 **Who are we ?** The „Animal Help Chalki” is a non-profit association which works for the welfare of animals, especially of cats and dogs on the island of Chalki (Halki)/ Dodekanes, founded 2008. Its members engage themselves in their protection and ethical keeping. We cooperate with the Animal Welfare Society “Filosoikos Syllogos Chalkis”, founded in 2007. The members are residents in Chalki from Greece and various foreign countries, as well as visitors and friends of the island.
